

Living Wills (Advance Directives)

Commonly known as “Living Wills,” advance directives allow individuals to protect their health care decisions and choices.

Individuals can choose to state specific health care choices (i.e. “Do everything medically possible in every situation,” “Never place me on a respirator”) or can name a specific person to make decisions if the individual is no longer capable.

Advance directives are for adults of all ages, not just for senior citizens.

Our health administrator assists residents with completing their Advance Directives at no cost. Please call Joyce Jacobson at 201-804-2421 to schedule an appointment.
