

Fire Protection System Inspection & Reporting Policy

Fire Protection System Inspection, Testing & Maintenance;

All fire protection systems in Lyndhurst Township are required by the applicable New Jersey adopted Fire Code to be inspected tested and maintained on regular intervals. The purpose of these inspections is to ensure the system will operate properly in the event of an incident, ensuring a safe environment by minimizing the risk of life and property loss.

The **Township of Lyndhurst Fire Prevention Office** has contracted with BRYCER, LLC to help manage the fire protections systems inspection, testing and maintenance program. All contractors who perform inspection, testing and maintenance services of fire protection systems are required to electronically submit all compliant and non-compliant reports to the department via: www.TheComplianceEngine.com.

Fire Protections Systems tracked by the Lyndhurst Township Fire Department include:

- Dry/Wet Sprinkler Systems
- 5yr Obstruction Sprinkler
- Fire Alarm
- Standpipes
- Hood Suppression System
- Hood Exhaust Cleaning
- Fire Pumps
- Special Suppression Systems
- Private Fire Hydrants
- Active Smoke Control Systems
- Emergency Power Generator
- Paint/Spray Booths
- Fire Escapes

Inspection Companies are required to submit test results to the Township of Lyndhurst Fire Prevention on behalf of their customers. Register with The Compliance Engine here; <https://www1.thecomplianceengine.com/company/register?e=1>
